ECYSAP

European Cyber Situational Awareness Platform

The main objective of the **ECYSAP** project is to develop and implement of innovative theoretical foundations, methods, research prototypes and their integration towards providing a European operational platform for enabling real-time Cyber Situational Awareness with rapid response defensive capabilities and decision-making support for military end-users.

An integrated and modular Cyber Situational Awareness (CSA) picture for National/European security purposes and military expeditionary operations will be developed, which shall become a real time defensive system capable of cyber response, automated and deployable in the same area of operations (National/European) interconnected between envisaged and identified intelligent nodes.
